

This is pretty graphic, but the guy is lucky to be alive.

Polar Bear Attack in the High Arctic ...

**This is from up in the NWT,
this guy is lucky to be alive.
The guy survived the bear attack.
The bear jumped on him
while he was sleeping
in his tent and he managed to get
it off of him and shoot it.**

One tough camper!

This is unbelievable.

It hurts just to look at it.

This is called a see-through foot.. Polar bears are the top predator in the North American continent.

KINDA MAKES YA WANT TO STAY AT HOME AND HIDE UNDER THE BED!

Moral: Don't go camping in the North in a TENT!
